Update of FIA Standard 8860-2010, Article 8, Retention System

Dear Sir or Madam,

We would like to inform you of an update of FIA Standard 8860-2010 by the addition of the design requirements for chinstraps. This change was approved by the World Motor Sport Council held in September in Paris. The updated standard can be found on the FIA website following the link: www.fia.com.

The creation of Article 8 under FIA Standard 8860-2010 is intended to define the design requirements for chinstraps. This will help the medical crews unfasten any type of helmet.

The helmet manufacturers will have to ensure that the 8860-2010 helmets approved as from 01.01.2017 will have a chinstrap meeting the new design requirements.

The updated regulation is applicable immediately.

We remain at your disposal for any further information you may require.

Yvan DEVIGNE
